

Dr. Li is the best acupuncturist I have ever come across. Her professional skills, talents, integrity and extremely caring manners are simply beyond measure. I have been her patient since 1999 and she has helped me with many problems including but not limited to headaches, eyes, shoulder/elbow/knee/ankle injuries, allergies, coughs, sleep disorder, and other internal problems. Not surprisingly, through the years, I have heard many success stories from other patients.

My work as a subtitler requires me to use the computer for long periods of time. Recently, Dr. Li has developed an even more effective treatment for eyes, which I have benefited greatly from and are thankful for.

I am sure Dr. Li's background as a surgical doctor makes it possible for her to look at any health problems from a more holistic point of view, and therefore making her a unique doctor.
