

I have known Helen for more than 10 years now, her clinic and her healing knowledge has helped me through all these years.

I went to see my doctor when I felt ill one day, and had a blood test. The blood test came back and the result was that I had Hep B. I was devastated and didn't know what to do. My family doctors prescribed medication to help prevent liver damage or live cancer.

I started taking this medication, I don't recall the name of this drug but I can clearly recall the way I felt when I was taking this medication.

I took this medication for a couple of months, and noticed that I was not getting better but instead worse.

The side effects were really bad. I had headaches, hair falling out, feeling tired and worse of all during the night I never get a good sleep. I felt like someone or something was choking me.

I would wake up during the night coughing and felt out of breath and felt like I was near death.

I had another blood test and the result came back saying that the activity in my body was high, and I was at risk of getting liver cancer.

My Doctors then referred me to a specialist, but I felt that this will not help me. I realized then that I needed to stop taking these strong medication and seek help else where.

This is when God guided me to Helen.

Helen started treating me by doing accupunture treatments and giving me herbal medication. I felt a big change compared to when I was taking the strong medication my doctor prescribed for me.

People complemented me on how beautiful I look and how much energy I have. I use to sleep alot and feeling tired and now its a whole new me, healthy and full of energy.

After a couple of months of taking herbal medication and doing accupunture, I went for another blood test. My result came back that the high activity in my body had gone right down. My liver was now normal unlike before.

I am so happy and I wanted to share my story with everyone who has the same problem as me.

Helen not only help with my liver problem but she helped my husband and I to have another child after trying for 10 years. My daughter is now four years old, healthy and happy. Thanks to Helens treatments.

Helen not only helps with liver problems but helps with many other problems such as Kidney problems, High blood pressure, Men and Women problems, Diabetes, heart problems, skin problems, and many other problems that you may have.

If you feel that you have tried every medication and no change or getting worse in what ever sickness you may have contact Helen straight away.

I strongly recommend Helens Accupuncture treatment, her healing needles as well as her herbal medicines because all this helped me with my illness. I am more happy than before because of the change in my health.

I have developed a close relationship with Helen over the years, and I don't only think of her as my doctor but she is like a mother and a good friend to me. Thankyou Helen God bless.
