

\* Acupuncture is being used to treat various sicknesses in China and many other countries for many years.

\* In New Zealand - Helen Li (Herbalist and Acupuncturist) - is working day and night treating many people each day.

I Mr X was having sexual problem also had stress and thought my relationship with my wife would deteriorate.

It happened that I got Helen's address in Manukau Courier and went to 144 East Tamaki Road, for treatment.

Acupuncture was being performed on me a number of times. When I had it for the fourth time, I had noticed improvement. Therefore I went for treatment regularly. I saw improvement gradually each day.

Now I am sexually fit but I still have the treatment once a week.

All <sup>West</sup> medicines can have some unwanted side effects. Acupuncture had no side effect instead it treats other organs and makes active as well. I am fully (8 times) recovered and really happy.
