

## Testimonial- Dr Helen Li

I began accupuncture treatments with Helen in April 2014 after I noticed the sign at her clinic in East Tamaki Rd.

I had unsuccessful accupuncture treatments last year and was keen to try another clinic.

The key issues of 9 years of disfunction I wished to address were:

- \*Lack of penile arousal and very droopy testicles
- \*No sex drive including almost dry orgasms
- \*No sperm discharge apart from an odd drop
- \*Allround fatigue
- \*Lack of confidence because of my lack of ability to get aroused and inability to perform normal sexual activities even though I am 56, fit and don't drink or smoke
- \*Burning feeling in the head of the penis and lack of force when urinating
- \*Bad sleeping

Helen initially prescribed a medicine daily and the treatment around a lower level large scar in the general waist area which she thought would restrict blood flow and muscle performance.

Within the first week I was feeling not so run down and sweating particularly in the area below my waist had stopped.

My urination was now with pressure and the penis had regained some size.

After a few treatments I discontinued the medicine and received weekly accupuncture resulting in a greatly improved general wellbeing, erections returned , the testicles are now solid and don't hang down, the penis is in a semi erect size all the time and I can with gentle stimulation get an erection in 1 to 2 minutes.

I now have noticeable sperm discharge at orgasm and some weight loss.

I can only speak too highly and recommend Dr Helen Li to interested patients who are seeking not only a Chinese qualified professional but a New Zealand qualified specialist as well.
